

Towner Energy Center

The Towner Energy Center is a proposed 1,000+ megawatt (MW) combined wind, solar and storage facility located in Kiowa County, Colorado. Wind, solar, and storage energy solutions are sources of clean renewable power, and today are some of the most affordable ways to modernize America’s energy grid.

Invested in Your Community

Clean energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community’s health and safety.

The project has been good for us to work with beginning to end. We appreciate the loyalty to the community, to the schools, and to the county and the efforts they put in to make this project successful and that it will last in our community for a very long time.”

Mark Noland

Community member & former school board member
Santa Rita East Wind, Irion County, TX

Project Highlights

More than **\$240 million** invested in local and state tax revenue over the life of the project

1,000 MW is enough electricity to power more than **395,000 American homes**

Up to **700 local & regional jobs** supported during construction

Approximately 30 full-time operations and maintenance staff in and around the county

Emissions reductions equivalent to over **800 million trees planted**

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy’s Miami Wind Energy Center, located in Gray, Hemphill, and Roberts Counties, Texas.

A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$400 million annually in the home communities where its projects are located.

Invenergy has successfully developed more than 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
